RYAN M. JOHNSON

FULL EMPLOYMENT HISTORY & PROFESSIONAL ACCOMPLISHMENTS | Tyler, Texas | linkedin.com/in/mckayjohnson

EXECUTIVE PROFILE

Enterprise technology leader and hands-on solution architect specializing in software engineering, applied AI, cloud and data platforms, enterprise integrations, digital transformation, product delivery and globally distributed engineering organizations. Experience spans consulting, healthcare, banking, investment management, mortgage technology, tax software, energy, manufacturing, retail, telecom and enterprise technology.

CAREER HIGHLIGHTS

- 50+ technology initiatives representing more than $35 million in historical project deliverables for 13 Fortune 500 organizations (over $10 million in direct sales).
- Led more than 38 engineering and delivery teams, with team sizes ranging from 3 to 60 people; coached or supported the development of more than 70 engineers and managers.
- Led consulting, architecture, Agile transformation, solution estimation, sales pursuits, executive presentations, vendor coordination, innovation workshops and global delivery across multiple enterprise industries.
- Hands-on expertise in modern Microsoft, AWS and Google technology ecosystems, AI-enabled platforms, APIs, .NET, Python, JavaScript front ends, distributed architectures, data processing, CI/CD and cloud operations.
- Built and led career-development, technical excellence and talent-community initiatives; co-founded a regional Digital Studio and served as a full-stack development practice leader.

EMPLOYMENT HISTORY & ACCOMPLISHMENTS

GREENWAY HEALTH | Enterprise Healthcare SaaS | Remote

Manager, Product Development — Clinical AI & Shared Data Platform

Aug 2025 – Sep 2026

Member of the Product and Engineering Leadership Team supporting shared data services and AI-enabled healthcare capabilities within a HIPAA-regulated enterprise software environment.

- Led globally distributed, cross-functional product and engineering work spanning platform services, solution architecture, software engineering, quality assurance, DevOps, analytics and external partners.
- Guided launch and ongoing evolution of normalized common data services enabling cross-EHR interoperability, enterprise reporting, analytics and AI application development.
- Aligned engineering priorities and long-term platform decisions with product roadmaps, regulatory responsibilities, reliability, security and maintainable service boundaries.
- Advanced cloud-native APIs, domain-aligned microservices, architecture governance and delivery practices for shared enterprise services.
- Contributed engineering leadership to Novare, an AI-enabled ambulatory platform covering documentation, chart preparation, patient intake, insurance eligibility and prior-authorization workflows.
- Championed responsible exploration of agentic AI and specification-driven engineering to improve delivery efficiency while preserving human review and operational controls.
- Healthcare SaaS product environment incorporating clinical AI, shared data platforms, interoperability and regulatory analytics; worked across clinical and enterprise engineering disciplines.

Manager, Product Development — Data Insights & Analytics

Oct 2024 – Sep 2025

Managed product-oriented engineering work supporting data insights, reporting and analytics for healthcare customers.

- Provided oversight of technical architecture, product delivery, design and software development execution in a regulated context.
- Managed distributed Agile/Scrum teams and coordinated software engineers, QA, DevOps, analytics specialists, vendors, contractors and international delivery colleagues.
- Connected solution delivery to business priorities, compliance obligations and release expectations across the product lifecycle.
- Supported scalable data and cloud-native delivery patterns and maintained alignment among stakeholders and engineering functions.

1:1 AGILETECH SOLUTIONS (formerly 1:1 Agile Coaching) | Independent Consulting

Cloud Solution Architect | Digital Transformation Advisor | Agile Coach

Jun 2023 – Oct 2024

Consulting practice offering solution architecture, digital strategy, cloud transformation and Lean/Agile organizational improvement.

- Designed and delivered Azure, OpenAI and Databricks analytics solutions, reducing a client ETL/loading workload from seven hours to 45 minutes.
- Developed an enterprise data analytics environment that reduced a separate processing cycle from 48 hours to eight hours, enabling faster operational insight.
- Led AWS and Azure migration, architecture and CI/CD initiatives; reduced the deployment process from three hours to approximately one hour.
- Improved platform reliability from approximately 80% to 95% availability; addressed scalability and post-migration defect resolution.
- Restructured software delivery processes and adoption of Scrum, Kanban and SAFe practices; shortened feature release intervals from six sprints to two.
- Modernized healthcare enterprise search from AWS Elasticsearch to Azure AI Search, adding OpenAI-driven workflows and reporting more than 80% improvement in search/query accuracy.
- Provided architecture-as-a-service, modernization road maps, design review, coaching, requirements decomposition and practical engineering support to clients.
- Facilitated organizational change, continuous improvement and delivery leadership with attention to culture, collaboration, team autonomy and measurable outcomes.
- Enterprise healthcare analytics and search modernization; advisory and implementation work across Azure, AWS, Databricks, OpenAI, cloud delivery and process transformation.

TAXACT (BLUCORA) | Tax Preparation and Financial Technology

Manager, Software Engineering & Innovation Strategy

Jul 2021 – Jun 2023

Managed three software product teams delivering core tax preparation, expert assistance and financial data-import experiences, coordinating approximately 20 technical contributors.

- Led engineering design, delivery and product evolution for XPert Assist, XPert Full-Service and Data Import platforms that simplified tax filing and access to professional tax guidance.

- Directed transformation roadmaps and architectural strategies to improve user journeys, support complex tax workflows and reduce manual document entry.
- Built intelligent document-processing capabilities using AWS Textract, Azure Cognitive Services / Forms Recognizer and Google Vision, integrating cloud automation and external financial data.
- Architected AWS and Azure solutions using Lambda, Functions, S3, SQL Server, PostgreSQL, MongoDB and event-driven distributed services.
- Introduced decoupled design, bounded application slices, CQRS/data-segregation patterns, microservices, containers, serverless processing and scalable API integrations.
- Improved application performance by approximately 30%, reduced operating expenses by approximately 20% and reduced infrastructure costs by over 25%.
- Led Genesys Cloud contact-center integration and scheduling experiences, reducing average customer wait time from 30minutes to five minutes.
- Supported product changes associated with 25% faster end-to-end tax filing and at least a 30% reduction in abandoned filings; earlier work history also cites doubled year-over-year acquisition in a specific assisted-filing segment.
- Coached engineers through design challenges, staffing constraints and delivery issues, fostering experimentation, technical learning and iterative release practices.
- Owned engineering execution, milestones, deliverables, Agile planning and cross-functional communication using tools including Azure DevOps, Jira and Confluence.
- XPert Assist; XPert Full-Service; Data Import and financial-institution integrations; intelligent tax-form processing; Genesys Cloud contact-center modernization.

AVANADE | Microsoft and Accenture Joint Venture | Enterprise Consulting

Group Manager, Software Engineering & Digital Innovation | Houston Digital Studio

Aug 2018 – Jul 2021

Senior consulting and engineering leadership in global enterprise software delivery, modernization and digital innovation.

- Led Fortune 500 engagements spanning complex software architecture, cloud modernization, machine learning, enterprise data and product delivery; led engagements totaling more than $25 million in billable work.
- Participated in approximately $10 million or more in commercial pursuits and sales through RFP responses, deal shaping, proposal architecture, executive presentations, workshops and solution estimation.
- Co-founded the Houston Digital Studio and helped establish it as a leading and highly profitable regional delivery and innovation practice.
- Served as Full-Stack Development Mindset Leader, championing Microsoft.NET, Azure, JavaScript, Angular, React, Vue and reusable modern-engineering practices.
- Led multidisciplinary and international teams, from focused engineering groups to programs with up to 60 contributors, including delivery across Asia, Europe, Latin America and North America.
- Owned envisioning, architecture blueprints, staffing, implementation roadmaps, complex-client dependencies, SLAs, risk assessments, quality strategy and operational transition.
- Participated in innovation days, design-thinking workshops, user-centered discovery, executive advisory and multi-consultancy engagements alongside organizations including Accenture, Microsoft, Deloitte, McKinsey and Slalom.
- Served on hiring panels assessing more than 100 internal/external candidates, supported recruitment, onboarding, promotion decisions, career development and retention.

- Acted as career adviser to engineering managers, conducting performance reviews, coaching, development planning and promotion-cycle advocacy.
- Earned a Rock Star Award and multiple Superhero Awards for delivery and people development; historical records cite strong performance ratings over repeated review cycles.
- Participated in the Workplace Guild and supported the Southwest Regional Digital Innovation Summit.
- Mortgage Cadence / major mortgage origination software: served as solution architect and technical/program lead in modernization from a legacy platform to a cloud-based SPA; coordinated 26 Scrum teams/product tracks, bottom-up estimates, staffing and SAFe PI planning; designed Angular, .NET Core, Redis and Azure SQL components, supported P1 escalations, testing strategy and deployment planning.
- Energy analytics engagement: solution architecture for Azure Databricks / Azure Data Lake machine-learning and predictive analytics serving oilfield operations and logistics within a large enterprise program.
- Telecommunications enterprise integration: Salesforce CRM to SharePoint document and access workflows, facilitating a sales environment described in historical material as approximately $11 billion in annual activity and tens of thousands of collaboration sites.
- Additional global delivery and client collaborations across consumer products, retail, utilities, industrial manufacturing, technology, healthcare and professional services.

Group Manager, Software Engineering

Nov 2016 - Jul 2021

- Led enterprise delivery from early sales/solutioning through architecture, staffing, engineering execution, Agile governance, testing and transition to operations.
- Managed onshore and offshore workstreams, frequently with more than 20 technical resources and long-running delivery plans.
- Coached enterprises in Agile practices and transformation roadmaps while remaining hands-on with requirements, detailed design, code review and custom implementation.
- Provided RFP and pursuit support, executive presentations, proposal refinement, solution roadmaps and client relationship management.
- Mentored managers in organizational leadership, hiring, annual reviews, advancement and individual career development.

Manager, Software Engineering | Microsoft Technology Solutions

Feb 2013 – Nov 2016

Led enterprise application architecture, user-experience engineering, BI/analytics, collaboration and Microsoft-platform consulting programs.

- Combined solution architect, scrum master, technical lead, project delivery and people-manager responsibilities for enterprise software engagements.
- Led design-thinking discovery, requirements gathering, business-process analysis, application design, integration and complex release delivery.
- Used Microsoft architecture and modern web engineering across distributed systems; led cross-functional and international engineering work.
- Helped deliver a large-scale investment management and accounting solution using configurable business rules, batch transaction processing, financial valuations, allocation and position calculations.
- Coordinated report conversion, enterprise data mapping, client requirements and integration with order-management, accounting and reporting systems.

- Facilitated delivery by multiple workgroups and worked as Scrum Master / technical lead to manage constraints, shifting priorities, quality expectations and stakeholder communication.
- Capital Group / major global investment manager: custom manager accounting/results and enterprise workflow modernization; hundreds of thousands of batch account/fund transactions; complex allocations, valuations and positions; extensive cross-functional delivery with roughly 40 participants, including client, Avanade and Accenture teams.

CREDERA | Management and Technology Consulting

Solutions Architect | Microsoft Service Line | Scrum Master & Delivery Lead

Jun 2012 – Feb 2013

Architected custom enterprise applications, collaboration systems and digital solutions for large clients.

- Led mixed client/consulting teams typically numbering five to eight engineers, improving productivity and delivering to demanding schedules.
- Defined SLAs conducted solution and risk assessments, established implementation plans, and managed handover to support.
- Led design and rollout of a major SharePoint migration serving more than 15,000 users for a large U.S. metallurgical-coal producer as part of a multimillion-dollar engagement.
- Architected a custom SharePoint optical-character-recognition solution for medical billing and document processing.
- Supported delivery management, client communication, Agile execution, staffing decisions and high-quality enterprise implementation.
- Industrial/manufacturing collaboration and migration; healthcare document-intelligence/OCR application; additional Fortune500 Microsoft-platform consulting.

ACCENTURE | CIO Group | Global Enterprise IT

Global Lead — Reporting Services, Architecture & Business Applications

Feb 2011 – Jun 2012

Directed globally distributed reporting architecture, support and analytics teams across Chicago, Bangalore, Chennai, Mumbai, Manila and Buenos Aires.

- Managed 22 full-time staff across reporting services; oversaw performance reviews, coaching, career paths, conflict resolution, team effectiveness and standardized service delivery.
- Led Reporting Architecture Services, a team of six solution architects supporting mission-critical reporting and self-service platforms reaching more than 300,000 internal users.
- Led Reporting Support Services, a team of 16 support engineers managing operational reporting, ETL, infrastructure, troubleshooting, remediation, platform stability and consistent global service practices.
- Advanced consolidated reporting platforms and shared tooling to reduce warehouse sprawl, duplicate ETL, reporting-cycle times and operational interruptions.
- Directed a Travel Reporting & Analytics solution with data engineers and analytics professionals to monitor weekly, monthly, quarterly and annual business travel expenses.
- Integrated American Express corporate card statements and reporting covering more than $500 million in annual travel spending to identify saving opportunities and strengthen vendor negotiations.
- Oversaw an enterprise report-generation and distribution architecture supporting formatted reports, ad hoc queries, automated routing, subscriptions, workflows and notifications.
- Coordinated quality benchmarks, validation rules and operating-group partnerships across finance, consulting, strategy, digital transformation and corporate operations.

- Accenture CIO internal analytics, report distribution, corporate travel intelligence, reporting architecture and global support operations.

NEURIC TECHNOLOGIES | Artificial Intelligence and Learning Technology Startup

Solutions Architect | Web Applications Development & User Experience Lead

Feb 2010 – Feb 2011

Led application design and development for a startup focused on proprietary natural-language and AI learning technologies.

- Architected a web-based learning management system used to teach and refine the proprietary Neuric Brain AI platform.
- Proposed and led prototype development of a cross-device rich internet learning application for the U.S. Army, designed for offline/disconnected operation during unreliable connectivity.
- Established a development arrangement with a Moscow-based engineering company, lowering net-new application development costs by approximately 70%.
- Coordinated software architecture, user experience, design, outsourcing relationships and hands-on development.
- Neuric Brain AI-learning system; U.S. Army Athena learning-system prototype.

BBVA COMPASS / GUARANTY FINANCIAL GROUP | Commercial Banking

Business Applications Specialist | Microsoft Solution Architect & Web Application Development Lead

Aug 2007 – Feb 2010

Supported banking business applications, acquisition integration, governance and enterprise web development.

- Led business application and web development efforts, working with retail and operations to set quality, accessibility, coding and UX standards.
- Coordinated data scrubbing, secure reporting and sensitive-client-information practices for enterprise communication and application migration.
- Participated in Guaranty Financial Group acquisition and integration, rationalizing, migrating, converging or retiring mission-critical banking applications with cross-functional teams and subcontractors.
- Defined internal web standards associated with an approximately 30% reduction in development turnaround.
- Improved vendor onboarding, annual vendor audits, internal knowledge systems, document collaboration and deposit-monitoring processes.
- Served as team and technical lead for a centralized vendor and contract management system, improving contract audits, resource oversight, procurement transparency, vendor vetting and escalation tracking.
- Designed vendor review, RFP response, contract renewals, risk and audit workflows, management reporting and governance capabilities.
- Worked across internal business stakeholders, IT support teams, operational departments and vendor relationships to improve services and cost control.
- Vendor View vendor and contract management; acquisition-related systems modernization and application portfolio rationalization; enterprise banking reporting and internal operations.

EARLIER EMPLOYMENT & TECHNICAL EXPERIENCE | Multiple Organizations

Software Development | Consulting | Web Design & Data Engineering | Systems Integration | Telecom Equipment

Feb 1998 – Aug 2007

Historical resumes group these positions and engagements together rather than supplying independently verified titles or dates for each organization.

- Technology consulting and software engineering: developed client commercial websites, pricing workflows and inventory tracking systems; redesigned a pricing system for offline/local operation to reduce cost.
- Web design and data engineering: developed online circulars and shopping-list functionality for Brookshire Grocery, supporting customer engagement and digital merchandising.
- Helped implement customer-facing wireless network capabilities within Brookshire Grocery retail locations.
- Systems integration, network administration and surface-mount technology programming for a telecom equipment services company; programmed SMT pick-and-place manufacturing equipment, doubling production throughput.
- Telecommunications switching hardware engineering: analyzed and reverse-engineered Nortel switching equipment for international customers.
- Provided technical engineering, application delivery, systems troubleshooting, data management and operational integration services in manufacturing, retail, hospitality, technology services and telecommunications.
- Organizations include Temple-Inland, Brookshire Grocery Company, Accor North America, Nucor Steel, SIVAD Consulting Services, Property Automation Software, Inter-Commercial Business Systems and Certech (Cerplex Group).
- Earlier commercial-website and business-systems work also includes Trane and related organizations.

ADDITIONAL CLIENT, PARTNER & INDUSTRY EXPERIENCE

Healthcare

Greenway Health; SCAN Health Plan; Baylor Scott & White Health; Texas Health Resources; Texas Medicaid Healthcare Partners; Phreesia Access eForms.

Banking, insurance, investments and financial technology

BBVA Compass; Guaranty Financial; Capital Group; Mortgage Cadence; TaxAct; Braintree (PayPal); JPMorgan Chase; Fidelity; Finicity; Freddie Mac; Equifax; American Express; Intuit; DocuSign; Duck Creek.

Energy, utilities, manufacturing and industrial

Chevron; Devon Energy; Schlumberger; Entergy; Chesapeake; Mewbourne Oil Company; Nucor; Temple-Inland.

Retail, consumer goods, hospitality, staffing and telecommunications

Procter & Gamble; Kellogg; Whole Foods; Brookshire Grocery; Amazon; McLane; Express Employment; Accor North America; Nokia; Alcatel-Lucent; Nortel; Trane.

Professional services, technology and consulting delivery

Accenture; Avanade; Microsoft; McKinsey; Deloitte; Slalom; Credera; Infosys; IBM; Gartner; Salesforce; Cybage; SIVAD; SAP.
