Ryan M Johnson

Sr Leader in AI, Software Engineering, Cloud Platforms, Analytics & Data Architectures

Tyler, Texas | 903.520.5416 | rmckayjohnson2021@gmail.com | linkedin.com/in/mckayjohnson | github.com/rmckayjohnson2021

Profile

Forward-thinking technology leader, solution architect, & software engineer with more than 18 years of hands-on technology experience and over 15 years of leadership guiding global delivery teams. Specializes in building the connective tissue between generative AI, data architecture, cloud platforms, and product execution across highly regulated domains including healthcare, fintech, energy, and regulatory compliance. Proven track record of managing global organizations, accelerating delivery timelines, modernizing legacy systems into scalable platforms, and transforming emerging AI technologies into secure, production-ready capabilities.

Primary capabilities: Generative AI delivery, data architecture, people development, cloud modernization, platform engineering, product management, innovation strategy, product & technology roadmaps, regulated-domains, and modernization / digital transformation.

Core Capabilities

- **Agentic AI & Applied AI Delivery:** Deploys OpenAI, MCP, A2A, spec-driven enterprise workflows, RAG pipelines, agentic AI tooling, and human-in-the-loop validation frameworks.
- **Engineering Leadership & People Development:** Cultivates high-trust, high-performing engineering cultures by scaling cross-functional teams, managing vendors, and mentoring individuals & coaching high-performance teams.
- **Data Architecture & Platforms:** Designs robust enterprise data ecosystems utilizing Databricks, Azure Data Lake, modern ETL pipelines, and API-integrated data products.
- **Cloud Computing & Platform Engineering:** Architects secure multi-cloud environments (Azure, AWS, GCP) using Serverless/Event-Driven/Containerized, Infrastructure as Code (IaC), CI/CD automation, and OpenTelemetry observability.

Professional Experience

Greenway Health | *Manager, Product Development (Clinical AI, Shared Data Platforms & Data Analytics)*

Oct 2024 - Sep 2026

- Engineering Leadership & Talent Development: Led globally distributed engineering and quality analytics teams delivering healthcare SaaS platforms, regulatory compliance solutions, and enterprise data services. Mentored engineers, developed technical talent, and strengthened team performance within HIPAA-regulated environments.
- Agentic AI Engineering Transformation: Pioneered specification-driven agentic AI development practices, reducing microservices delivery from 12+ weeks with 4–6 engineers to just 4 days with one engineer—a 20×+ acceleration, with production deployment following engineering validation and testing.
- Enterprise Architecture & Modernization: Contributed to 70+ OpenAPI-compliant services for Novare, Greenway's next-generation cloud EHR platform. Advanced contract-first architecture, FHIR interoperability, cloud-native microservices, and automated delivery pipelines.
- Engineering Quality & Regulatory Delivery: Established 85% automated test coverage standards for new code and pull requests while directing cloud-hosted data ingestion, enrichment, and regulatory reporting solutions supporting MIPS, eCQMs, UDS, and UDS+.

1:1 AgileTech Solutions | *Cloud Solution Architect & Product Strategist*

Jun 2023 - Oct 2024

- Cloud & Data Architecture: Designed Azure, OpenAI, and Databricks analytics solutions, reducing ETL processing times from 7 hours to 45 minutes and accelerating enterprise data analytics and reporting.
- AI-Driven Modernization: Migrated legacy AWS Elasticsearch solutions to Azure AI Search, incorporating OpenAI-enabled workflows and improving data quality and search accuracy by more than 80%.

- Cloud Transformation & Operational Efficiency: Directed AWS and Azure modernization initiatives, reducing deployment times from 3 hours to 1 hour and improving platform availability from 80% to 95%.
- Product Engineering & Agile Transformation: Developed two proprietary software products and delivered architecture and modernization services across two client engagements. Improved engineering delivery practices, reducing feature release cycles from 6 sprints to 2.

TaxAct | *Manager, Software Engineering & Innovation Strategy*

Jul 2021 - Jun 2023

- Led 3 dedicated product development teams delivering flagship tax-processing assistance platforms, contact-center workflows, and customer experiences.
- Architected intelligent document processing engines using AWS Textract, Azure Cognitive Services, and serverless compute functions to automate manual data entry.
- Engineered event-driven, decoupled cloud microservices that boosted overall application performance by 30% while reducing enterprise operating costs by 20%.
- Integrated Genesys Cloud systems into client scheduling workflows, successfully reducing average customer wait times from 30 minutes to 5 minutes

Avanade | *Group Manager, Software Engineering & Digital Innovation*

Feb 2013 - Jul 2021

- Directed enterprise-level cloud, software, and data modernization initiatives for Fortune 500 clients, delivering over $25M in billable work and contributing to $10M in sales.
- Supervised large-scale engagements comprising 20+ onshore and offshore technical contributors, owning everything from staffing plans to delivery roadmaps.
- Co-founded the regional Digital Studio and acted as Full-Stack Development Mindset Leader across .NET, Azure, and modern JavaScript frameworks.
- Evaluated more than 100 internal and external candidates on executive hiring panels while coaching engineering managers through promotion cycles.

Credera | *Solutions Architect*

Jun 2012 - Feb 2013

- Managed engineering teams of 5 to 8 developers delivering custom SharePoint enterprise migrations for over 15,000 active users.
- Designed automated OCR text-recognition pipelines to streamline medical billing and digital document processing.

Accenture | *Global Lead, Reporting Services CIO Group*

Feb 2011 - Jun 2012

- Managed 3 global engineering teams totaling 22 architects and engineers across reporting support, data architecture, and travel analytics lines.
- Consolidated self-service corporate reporting portals for an internal user base exceeding 300,000 stakeholders.

Neuric Technologies | *Solutions Architect/AI Applications*

Feb 2010 - Feb 2011

- Architected web learning environments for a proprietary AI system, establishing offshore capabilities that cut application development costs by 70%.
- Software architect for a web-based Learning Management System (LMS) for training AI models.

BBVA Compass | *Solutions Architect/Web Applications*

Aug 2007 - Feb 2010

- Led initiatives to enhance application capabilities and reduce costs, coordinating with operations and retail departments to establish industry-aligned quality standards, & vendor management.
- Led deep application rationalization and data scrubbing workstreams during major bank acquisition integrations.

Education

- Master of Science in Information Systems | Bellevue University
- Bachelor of Science in Computer Information Systems | Post University (American Sentinel, a college of Post University)

Selected Certifications and Professional Development

- ACN Professional Certificate: Systems Integration Solution Architect (SISA) | Accenture
- DevOps Professional Certificate | PagerDuty
- Test Automation Professional Certificate | TestMu AI
- Essentials in GitHub Professional Certificate | GitHub
- Professional Certificate in Product Management | Aha!
- Professional Certificate in IT Leadership | ServiceNow
- Targeted Innovation | Project Management Institute
- Leading Change | Project Management Institute
- Data Landscape of GenAI for Project Managers | Project Management Institute
- Azure: Deploying Cloud-Native Container Apps | Microsoft
- Essentials in Data Analysis | Microsoft
- Angular: Developing Responsive Omni Channel Single Page Applications | Avanade
- Essentials in Cybersecurity | Microsoft
- Fundamentals of Responsible Generative AI | Microsoft
- Building Generative AI Productivity Skills | Microsoft
- Essentials in Generative AI | Microsoft
- Google Cloud Learning Path: Generative AI | Google
- Machine Learning Operations (MLOps) for Generative AI | Google Cloud
- Professional Scrum Master I (PSM I) | Scrum.org
- Professional Scrum Developer I (PSD I) | Scrum.org
- Certified Agile Professional (ICP) | ICAgile
- Certified Agile Professional Coach (ICP-ACC) | ICAgile
- Certified Professional - Agile Test Automation (ICP-ATA) | ICAgile
- Master Certification in C# | Brainbench

Technology Index

- **AI & Advanced Analytics:** Generative AI, Applied AI, Azure OpenAI, OpenAI API, Databricks, RAG, Agentic AI, Azure AI Search, Azure Cognitive Services, AWS Textract, Google Vision, Power BI, Azure Data Factory, Azure Data Lake, Data Modeling, Spec-Driven Development, Claude, Copilot, Microsoft Fabric, Anthropic MCP, Google A2A, Google API Management.
- **Cloud & Platform Engineering:** Azure, AWS, Google Cloud, Docker, Kubernetes, CI/CD, Jenkins, Azure DevOps, GitHub Actions, IaC / Terraform, REST APIs, GraphQL, Microservices, Event-Driven Architecture, Domain-Driven Design, OpenTelemetry, IAM, RBAC, FinOps, SecOps, DevOps, MLOps
- **Languages & Frameworks:** C#, Java, Python, TypeScript, Node.js, Angular, React, React Native, Streamlit, Flutter, Blazor.net, Vue.js.

Highlighted Projects

- **Novare AI-Powered Care Platform:** Provided critical engineering leadership for the AI-first scheduling, eligibility verification, authorization workflows, coding support, claim readiness, denials automation, appeals support, charge capture, payment responsibility, and patient engagement connected workflows for clinicians & front office. https://www.greenwayhealth.com/novare
- **AERO:** an enterprise execution-intelligence platform I designed to connect cloud and AI spending with accountability, governance, and verifiable business outcomes. It provides features like budget admission controls, OpenTelemetry evidence tracing, workload cost forecasting, and an Optimization Lab to test performance without sacrificing output quality. The platform serves as a complementary layer to tools like Azure Cost Management and Microsoft Fabric Capacity Metrics by tracking workload-owner attribution and charge holds. https://www.1to1agiletechsolutions.com/aero/
- **AI Delivery Ops Skills:** a lightweight, Codex-style toolkit designed to help teams transform rough AI product concepts into structured, reviewable delivery artifacts. It provides five core reusable skills and templates covering phased PRDs, prototype spike plans, implementation handoffs, evaluation plans, and governance reviews. These components enable engineering and product teams to explicitly define scope, mitigate risks, track cost and quality metrics, and establish accountability before launch. Additionally, the repository includes a zero-build static browser, local installation guidance, and practical workflow examples to support repeatable AI development operations. https://www.1to1agiletechsolutions.com/capabilities/ai-delivery-ops/
- **Comprehensive FinTech Assistance Platforms (TaxAct):** Orchestrated flagship products (XPert Assist/Full-Service), implementing intelligent document processing via AWS Textract, Azure Forms Recognizer, and Google Vision to eliminate manual entry, alongside full Genesys Cloud contact center modernization. https://www.taxact.com/tax-xpert-assist/xpert-full-service
- **AI/ML Well Phase Prediction Platform (Global Oil & Gas):** Served as Solution Architect within a $1B analytics program, designing a machine learning architecture on Azure Databricks and Azure Data Lake to predict operational well completions and optimize global logistics.
- **Loan Origination Fintech Modernization (Leading Mortgage Platform):** Managed multiple engineering teams and coordinated across 26 distinct product tracks to re-engineer a massive monolithic mortgage servicing system into a decoupled enterprise architecture.
