

Ryan M Johnson

Solution Architect & Principal Software Engineer | AI, Agentic Systems & Cloud Platforms

Tyler, Texas | 903.520.5416 | rmckayjohnson2021@gmail.com | linkedin.com/in/mckayjohnson | github.com/rmckayjohnson2021

Profile

Solution architect, principal software engineer, and innovation/change leader with close to 20 years in enterprise technology and 15+ years guiding technical teams through cloud, data, AI, and modernization. Connects product needs, agentic AI patterns, production engineering, cloud platforms, data architecture, and disciplined delivery. Known for turning emerging technology into working systems, modernizing complex platforms, mentoring engineers and technical leaders, and establishing engineering practices that make delivery faster, safer, and more repeatable.

Core Capabilities

- **AI & Agentic Systems Delivery:** Builds reviewable AI workflows using agents, tool-calling, orchestration layers, OpenAI/Azure OpenAI patterns, RAG, structured outputs, model routing, context engineering, MCP/A2A familiarity, human review, evaluation loops, and AI-assisted development.
- **Software Engineering & Architecture:** Designs and delivers Python, C#/.NET, TypeScript/JavaScript, APIs, backend services, integrations, full-stack features, and production-oriented applications.
- **Cloud, Platform & Data Engineering:** Architects Azure, AWS, and Google Cloud solutions using serverless, containers, CI/CD, observability, IAM/RBAC, Databricks, data pipelines, and API-integrated data products.
- **Enterprise Modernization & Integration:** Turns legacy systems into API-first, event-driven, domain-aligned platforms with clearer operating models, technical debt strategy, and transition-to-operations planning.
- **Technical Leadership & Change Enablement:** Guides architecture decisions, implementation approaches, code/design review, engineering standards, mentoring, product alignment, Agile delivery, and cross-functional execution.

Professional Experience (Abridged)

Greenway Health | *Manager, Product Development* (Oct 2024 - Sep 2026)

- Guided distributed engineering delivery for Clinical AI, Shared Data Platform, Data Insights, analytics, regulatory reporting, interoperability, and shared services in a HIPAA-regulated SaaS environment.
- Contributed engineering leadership to Novare, Greenway's native agentic-AI, AI-by-design platform connecting clinical, patient, revenue-cycle, documentation, coding, prior authorization, eligibility, and practice-management workflows.
- Aligned product strategy, architecture, software engineering, data engineering, QA, DevOps, vendors, contractors, and international delivery partners around reliable shared-platform outcomes.
- Advanced spec-driven agentic AI delivery for Novare, API-first modernization, context-rich requirements, domain-driven microservices, reusable engineering patterns, AI-assisted coding practices, and cloud-native shared services while balancing reliability, security, technical debt, and product value.

1:1 AgilTech Solutions | *Cloud Solution Architect & Agile Coach* (Jun 2023 - Oct 2024)

- Designed and deployed analytics platforms using Azure, OpenAI, and Databricks, reducing ETL processing from 7 hours to 45 minutes.
- Modernized healthcare search by migrating AWS Elasticsearch to Azure AI Search with OpenAI-enabled workflows, improving data-query accuracy and business usability.
- Improved AWS/Azure cloud migration, CI/CD, and release practices, reducing infrastructure deployment time from 3 hours to 1 hour and release intervals from 6 sprints to 2.
- Provided solution architecture, digital roadmaps, Agile coaching, and practical transformation guidance for clients translating operational needs into executable technology plans.

TaxAct | *Manager, Software Engineering & Innovation Strategy* (Jul 2021 - Jun 2023)

- Led product engineering for XPert Assist, XPert Full-Service, data-import platforms, contact-center workflows, and customer-facing tax experiences.
- Guided intelligent document processing using AWS Textract, Azure Cognitive Services, Google Vision, AWS Lambda, and Azure Functions to reduce manual entry and improve tax-processing accuracy.
- Architected decoupled UI slices, CQRS-oriented data patterns, containers, AWS serverless compute, and stateless event-driven microservices, improving performance by 30% and reducing operating costs by 20%.
- Integrated Genesys Cloud into scheduling and contact-center workflows, reducing average customer wait times from 30 minutes to 5 minutes.

Avanade | *Group Manager, Software Engineering & Digital Innovation* (Feb 2013 - Jul 2021)

- Directed enterprise application, analytics, content, and cloud modernization across mortgage, energy, oil-field analytics, and digital innovation programs; owned solution design, delivery roadmaps, estimates, and transition to operations.
- Co-founded the Houston Digital Studio and served as Full-Stack Development Mindset Leader across .NET, Azure, JavaScript frameworks, mobile, data, integration, and cloud-native practices.
- Led solution designs spanning Angular, .NET Core, Redis, SQL Azure, Azure Databricks, Data Lake, cloud data factories, Power BI, hybrid enterprise search, and unit/integration testing strategies.
- Coached engineering leaders through promotion cycles, performance feedback, delivery expectations, and technical growth; supported hiring panels and candidate assessments for engineering roles.

Credera | *Solutions Architect* (Jun 2012 - Feb 2013)

- Led solution architecture for enterprise applications, including SharePoint migration for 15,000+ users and OCR-enabled medical billing/document-processing workflows.
- Defined service levels, solution risks, implementation strategies, and transition plans for distributed systems and application support.

Accenture | *Global Lead, Reporting Services CIO Group* (Feb 2011 - Jun 2012)

- Led reporting support, reporting architecture, and travel analytics teams supporting enterprise reporting services and self-service analytics portals across corporate business functions.
- Directed architecture support and analytics consolidation efforts for high-scale internal systems, including travel analytics integrating corporate-card data for cost and policy insight.

Neuric Technologies & BBVA Compass | *Early Leadership & Architecture Roles* (Aug 2007 - Feb 2011)

- Architected a web-based learning platform for a proprietary AI system and helped establish offshore delivery practices that reduced new-application development costs by 70%.
- Led application rationalization, data scrubbing, reporting, vendor coordination, and internal web standards during banking acquisition integration work.

AI and Agentic Systems Portfolio + Projects (Highlighted)

Novare | *AI-powered ambulatory care platform*

Greenway Health proprietary platform | greenwayhealth.com/novare

- Contributed engineering leadership to Greenway Health's cloud-based platform unifying EHR, practice management, revenue-cycle, ambient documentation, chart preparation, coding support, eligibility, and prior authorization workflows.
- Led globally distributed delivery across Clinical AI, Shared Data Platform, Data Insights, and Analytics; advanced shared data services, roles and permissions, AI-assisted workflows, reusable engineering automation, and HIPAA-regulated delivery practices.

RunbookOps AI | Reviewable incident-triage workflow

github.com/rmckayjohnson2021/team-ai-incident-triage

- Built a Python/Streamlit application that turns noisy synthetic incident reports into structured, sourced triage recommendations using approved runbook retrieval, OpenAI Responses API, Pydantic validation, deterministic severity calibration, and human-review routing.
- Added held-out evaluation, reviewer feedback capture, a learning backlog, gateway integration, and automated Ruff/pytest checks; latest synthetic evaluation showed 95% category accuracy, 100% severity accuracy, and 100% review-routing accuracy.

CostOps Gateway and LLM Evaluation | Model execution controls

github.com/rmckayjohnson2021/llm-cost-eval-gateway

- Built a reusable FastAPI execution layer with configurable model routing, pre-call budget checks, bounded retries, Pydantic contracts, mock/OpenAI provider adapters, API-key protected endpoints, and SQLite usage accounting.
- Created a Streamlit cost dashboard, route-policy comparisons, projected ledger seeding, and tests covering API access, routing, budgets, retries, ledger behavior, and reporting.

AI Delivery Ops Skills Solution | Reusable templates

github.com/rmckayjohnson2021/ai-delivery-ops-skills

- Built a reusable Codex-style skills and templates for turning rough AI product ideas into phased delivery artifacts that teams can build, evaluate, govern, and review.
- Designed to onvert messy requirements into a phased PRD; Plan a spike before committing to a full build; Provide engineering with actual artifacts (e.g., interfaces, tests, risks, etc.)...
- Intentionally lightweight skills that are intended to facilitate teams to ask the right questions early and leave a clear handoff trail

AI/ML Well Phase Prediction Platform | Enterprise energy analytics

Client delivery | \$1BN global oil and gas modernization program

- Led solution architecture for an ML analytics platform integrating drilling, completions, salt-water disposal, and logistics data to predict well phase completion and support operational planning.
- Designed Azure-based data and application patterns across .NET Core, Angular, Azure Functions, Data Factory, Databricks, Data Lake, SQL Server, Azure DevOps, and predictive analytics workflows for real-time monitoring and logistics optimization.

Education

- **Master of Science in Information Systems** | Bellevue University | Magna Cum Laude
- **Bachelor of Science in Computer Information Systems** | Post University | Cum Laude | Degree conferred by American Sentinel University, a college of Post University

Selected Certifications and Professional Development

- Accenture Systems Integration Solution Architect; Practitioner Systems Integration Solution Architect
- Professional Scrum Master I; Professional Scrum Developer I; Certified Scrum Developer
- ICAgile Certified Professional; Agile Coaching; Agile Test Automation
- Google Cloud Generative AI Learning Path; Introduction to Large Language Models; MLOps for Generative AI
- Microsoft Responsible Generative AI; Build Generative AI Productivity Skills; Essentials in Generative AI
- Practical GitHub Copilot; Practical GitHub Actions; Essentials in GitHub Professional Certificate
- Azure, AWS, and Kubernetes: Azure Data Options for Performance and Scale; Azure Cloud-Native Container Apps; AWS CloudFormation; AWS Storage and Data Management; Advanced Kubernetes

- DevOps and quality: Continuous Delivery with Azure DevOps; FinOps Essentials for Cloud Deployments; Test Automation Professional Certificate; Brainbench Master Certification in C#
- Security: Microsoft Essentials in Cybersecurity; Cybersecurity Foundations; The Cybersecurity Threat Landscape

Technology Index

AI, Agentic Systems & Data: Generative AI, Azure OpenAI, OpenAI API/Responses API, RAG, agents, agentic AI, tool-calling workflows, orchestration layers, multi-agent system patterns, agent frameworks, context engineering, MCP/A2A familiarity, model-tool-data-API workflow integration, Azure AI Search, Azure Cognitive Services, Azure Machine Learning, AWS Textract, Google Vision, Databricks, Power BI, Azure Data Factory, Azure Data Lake, SQL Server, PostgreSQL, SQLite, data modeling, ETL, evaluation workflows, human review, usage tracking, and responsible AI practices.

Cloud, Software & Platform Engineering: Python, C#/.NET, TypeScript, JavaScript, FastAPI, Pydantic, Streamlit, Angular, React, Node.js, Azure, AWS, Google Cloud, Azure Functions, AWS Lambda, Docker, Kubernetes, CI/CD, Azure DevOps, GitHub Actions, infrastructure as code, REST APIs, microservices, event-driven architecture, domain-driven design, OpenTelemetry, IAM, RBAC, FinOps, observability, service reliability, Agile, Scrum, Kanban, and SAFe.
