

Ryan M Johnson

AI Engineering and Cloud Platform Leadership

Tyler, Texas | 903.520.5416 | rmckayjohnson2021@gmail.com | linkedin.com/in/mckayjohnson | github.com/rmckayjohnson2021

Profile

Forward-thinking technology leader, solution architect, & software engineer with more than 18 years of hands-on technology experience and over 15 years of leadership guiding global delivery teams. Specializes in building the connective tissue between generative AI, data architecture, cloud platforms, and product execution across highly regulated domains including healthcare, fintech, and energy. Proven track record of managing global organizations, accelerating delivery timelines, modernizing legacy systems into scalable platforms, and transforming emerging AI technologies into secure, production-ready capabilities.

Core Capabilities

- **Generative AI & Applied AI Delivery:** Deploys OpenAI and Azure OpenAI enterprise patterns, RAG pipelines, agentic AI tooling, and human-in-the-loop validation frameworks.
- **Data Architecture & Platforms:** Designs robust enterprise data ecosystems utilizing Databricks, Azure Data Lake, modern ETL pipelines, and API-integrated data products.
- **Cloud Computing & Platform Engineering:** Architects secure multi-cloud environments (Azure, AWS, GCP) using Kubernetes, Infrastructure as Code (IaC), CI/CD automation, and OpenTelemetry observability.
- **Enterprise Modernization & Strategy:** Translates legacy monolith architectures into decentralized, event-driven microservices using domain-driven design principles.
- **Engineering Leadership & People Development:** Cultivates high-trust, high-performing engineering cultures by scaling cross-functional teams, managing vendors, and mentoring technical managers.

Professional Experience

Greenway Health | *Manager, Product Development* (Oct 2024 - Sep 2026)

- Directed globally distributed engineering teams across Clinical AI, Shared Data Platforms, and Data Insights divisions within a HIPAA-regulated SaaS environment.
- Aligned global engineering execution with overarching product strategies, managing cross-functional alignment across software engineering, QA, DevOps, and international delivery vendors.
- Orchestrated platform architecture and cloud-native modernization strategies, accelerating the adoption of agentic AI tooling and spec-driven engineering practices.
- Balanced commercial features with rigorous compliance, security, technical debt reduction, and long-term shared data platform goals.

1:1 AgileTech Solutions | *Cloud Solution Architect & Agile Coach* (Jun 2023 - Oct 2024)

- Designed and deployed high-performance analytics platforms using Azure, OpenAI, and Databricks, which successfully reduced ETL processing times from 7 hours down to 45 minutes.
- Modernized legacy healthcare enterprise search systems by migrating AWS Elasticsearch to Azure AI Search with OpenAI-enabled workflows, significantly boosting query accuracy.
- Spearheaded AWS and Azure cloud migrations alongside CI/CD optimization, reducing infrastructure deployment times from 3 hours to 1 hour.
- Optimized software release intervals across engineering units, successfully cutting release cycles from 6 sprints down to 2.

TaxAct | *Manager, Software Engineering & Innovation Strategy* (Jul 2021 - Jun 2023)

- Led 3 dedicated product development teams delivering flagship tax-processing assistance platforms, contact-center workflows, and customer experiences.
- Architected intelligent document processing engines using AWS Textract, Azure Cognitive Services, and serverless compute functions to automate manual data entry.
- Engineered event-driven, decoupled cloud microservices that boosted overall application performance by 30% while reducing enterprise operating costs by 20%.
- Integrated Genesys Cloud systems into client scheduling workflows, successfully reducing average customer wait times from 30 minutes to 5 minutes.

Avanade | *Group Manager, Software Engineering & Digital Innovation* (Feb 2013 - Jul 2021)

- Directed enterprise-level cloud, software, and data modernization initiatives for Fortune 500 clients, delivering over \$25M in billable work and contributing to \$10M in sales.
- Supervised large-scale engagements comprising 20+ onshore and offshore technical contributors, owning everything from staffing plans to delivery roadmaps.
- Co-founded the regional Digital Studio and acted as Full-Stack Development Mindset Leader across .NET, Azure, and modern JavaScript frameworks.
- Evaluated more than 100 internal and external candidates on executive hiring panels while coaching engineering managers through promotion cycles.

Credera | *Solutions Architect* (Jun 2012 - Feb 2013)

- Managed engineering teams of 5 to 8 developers delivering custom SharePoint enterprise migrations for over 15,000 active users.
- Designed automated OCR text-recognition pipelines to streamline medical billing and digital document processing.

Accenture | *Global Lead, Reporting Services CIO Group* (Feb 2011 - Jun 2012)

- Managed 3 global engineering teams totaling 22 architects and engineers across reporting support, data architecture, and travel analytics lines.
- Consolidated self-service corporate reporting portals for an internal user base exceeding 300,000 stakeholders.

Neuric Technologies & BBVA Compass | *Early Leadership & Architecture Roles* (Aug 2007 - Feb 2011)

- Architected web learning environments for a proprietary AI system, establishing offshore capabilities that cut application development costs by 70%.
- Led deep application rationalization and data scrubbing workstreams during major bank acquisition integrations.

Highlighted Projects

- **Novare AI-Powered Care Platform (Greenway Health):** Provided critical engineering leadership for an ambulatory cloud platform embedding ambient documentation, chart preparation, voice search, and medical prior authorization workflows into a unified EHR environment.
- **Comprehensive FinTech Assistance Platforms (TaxAct):** Orchestrated flagship products (XPert Assist/Full-Service), implementing intelligent document processing via AWS Textract, Azure Forms Recognizer, and Google Vision to eliminate manual entry, alongside full Genesys Cloud contact center modernization.
- **AI/ML Well Phase Prediction Platform (Avanade / Global Oil & Gas Major):** Served as Solution Architect within a \$1B analytics program, designing a machine learning architecture on Azure Databricks and Azure Data Lake to predict operational well completions and optimize global logistics.
- **Loan Origination Fintech Modernization (Avanade / Top 3 Mortgage Platform):** Managed multiple engineering teams and coordinated across 26 distinct product tracks to re-engineer a massive monolithic mortgage servicing system into a decoupled enterprise architecture.

- **Automated Integration Architecture (Avanade / Major Telecom Leader):** Engineered a secure, automated integration engine bridging Salesforce CRM and SharePoint that managed permissions and workflows streamlining an \$11B annual sales cycle across 50,000 site collections.

Education

- **Master of Science in Information Systems** | Bellevue University | Magna Cum Laude
- **Bachelor of Science in Computer Information Systems** | Post University (Degree conferred by American Sentinel University, a college of Post University) | Cum Laude

Selected Certifications and Professional Development

- Accenture Systems Integration Solution Architect
- Professional Scrum Master I and Professional Scrum Developer I
- ICAgile Certified Professional - Agile Coaching
- ICAgile Certified Professional - Agile Test Automation
- Google Cloud Generative AI Learning Path
- Microsoft Fundamentals of Responsible Generative AI
- Microsoft Build Generative AI Productivity Skills
- Azure Data Options for Performance and Scale
- AWS Advanced CloudFormation for Enterprise
- AWS Storage and Data Management
- AWS Development Provisioning and Automation
- Continuous Delivery with Azure DevOps
- Azure DevOps Continuous Delivery and Implementing Development Processes
- Practical GitHub Actions and Practical GitHub Copilot
- FinOps Essentials for Cloud Deployments
- Product Management Building a Product Roadmap and Customer Development
- Technical Product Management
- DevOps Professional Certificate by PagerDuty
- Semrush IT Leadership Professional Certificate
- Brainbench Master Certification in C#

Technology Index

AI & Advanced Analytics: Generative AI, Azure OpenAI, OpenAI API, Databricks, RAG, Agentic AI, Azure AI Search, Azure Cognitive Services, AWS Textract, Google Vision, Power BI, Azure Data Factory, Azure Data Lake, Data Modeling.

Cloud & Platform Engineering: Azure, AWS, Google Cloud, Docker, Kubernetes, CI/CD, Azure DevOps, GitHub Actions, IaC, REST APIs, Microservices, Event-Driven Architecture, Domain-Driven Design, OpenTelemetry, IAM, RBAC, FinOps.
